Instructions

E-mail:

At the moment our E-mail function requires that you have an e-mail program such as Outlook, thunderbird etc installed in order to send the form directly. (Naturally you can print out the document and fill it out by hand and send via ordinary mail if you prefer)

How to use the form:

Fill out the form and then hit the "E-mail" button. The document will call upon your e-mail program and give you an e-mail with the filled out document attached. You will however need to fill out the "to" (e-mail address) field with ik@agrippa.biz
In some cases the "Subject" field need to be filled out as well, this is optional.

Printing:

When you hit the "print" button the document will call upon the printer windows in which you can decide what kind of print you prefer. As a standard it will print all, but you can also choose separate pages. For example: If you're interested in a certain product you can simply choose the "actual page" alternative before printing
